EDUCATION

Vellore Institute of Technology

2023-2027

B.Tech - Computer Science and Engineering - CGPA - 9.03

Girls' High School & College

2010-2023

Stream: PCM with Computer Science - XII - 82.0%, X - 95.2%

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, Redis, Recharts

CS Fundamentals: Object-Oriented Programming, Database Management System, Operating System

PROJECTS

SafeSphere | [Link- tinyurl.com/safesphere](https://tinyurl.com/safesphere)

- Built a Chrome extension that scans emails on Gmail and tweets on Twitter in the background, checking for toxic text and harmful images.
- Built a Node.js and Express backend that sends text and images to the Sightsense API and scores each item from 1 to 10.
- Added Safe, Warning, and Suspected badges and blurred anything scoring above 7, with a stronger blur for flagged images.
- Added caching in Chrome local storage (24 hours) and Redis (5 minutes), using SHA-256 hashes as keys so raw user text is never stored, reducing response time.

IPDR Communication Analysis Tool | [Link- tinyurl.com/tool-ipdr](https://tinyurl.com/tool-ipdr)

- Built a tool that reads IPDR logs uploaded as CSV, TXT, or JSON and pulls out the phone numbers and public IP addresses of the caller (A-party) and receiver (B-party).
- a parser that cleans and standardizes different log formats and filters records, making data extraction faster. Parsed data is stored in MongoDB, which handles the different log structures telecom providers use.
- Built a single-page React dashboard with Recharts including interactive charts and a network graph showing who is communicating with whom.
- Added IP geolocation on a map so investigators can see where each public IP is located, and used Clerk login so only authorized users can access the data.

Mini Interview Simulation | [Link- tinyurl.com/mini-interview-simulation](https://tinyurl.com/mini-interview-simulation)

- Built a browser-based mock interview app where users answer timed questions while their camera and microphone record.
- Used the MediaRecorder API to capture the session in the browser, with no server needed for recording.
- Added a countdown timer and start/stop controls that manage the interview length and recording state automatically.
- Built a preview and playback screen where users can rewatch their answers and download the recording.

EXTRACURRICULAR

- President, GDG on Campus (2025-2026): Led an 80+ member team and launched the club's first website (1.1K+ visits), ran events with 350+ participants, and brought in ClozDesigns as a sponsor, leading to 15+ customer sign-ups.
- Web Team Member, GDG on Campus (2024-2025): Built and improved responsive pages for the club's website and kept live event pages updated with schedules, registration info, and announcements.
- 2nd place, Visionary Hackathon (organized by Cisco Community)
- 3rd place, CyberShield '25 Hackathon (organized by WiCyS Student Chapter)
